PROFILE SUMMARY

Information Technology undergraduate with strong interest in backend engineering and full-stack web development, specializing in MERN stack, Node.js, TypeScript, SQL/NoSQL databases, and REST APIs. Experienced in building real-time applications, authentication systems, role-based platforms, and scalable web applications through projects and internship experience. Possesses strong problem-solving skills, competitive programming experience, and a solid understanding of software development, database design, and modern engineering practices.

EXPERIENCE

- **eSparkBiz Technologies Pvt. Ltd.** Jan 2026 - Present
Software Developer Intern Ahmedabad, Gujarat
 - Completed intensive industry training in HTML, CSS, JavaScript, TypeScript, MySQL, and NodeJs as part of full-stack development learning programs.
 - Worked on backend development fundamentals, REST API concepts, database operations, and scalable web application architecture.
 - Gained hands-on exposure to modern software development workflows, debugging practices, version control, and real-world development environments.

TECHNICAL SKILLS AND HOBBIES

- **Languages:** C, C++, Java(OOP), Javascript, Typescript
- **Frameworks and Libraries:** ReactJs, NodeJs, ExpressJs, Redux-toolkit, Zustand, Django
- **Other Platforms:** Solved over 250 problems in Codeforces, 200+ in Leetcode, 2 star in Codechef
- **Version Control:** Git, GitHub
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase, Firebase-Realtime
- **Core Subjects:** OOP, DBMS, OS, Data Structures, Computer Networks
- **Hobbies:** Sketching, Badminton
- **CP Profiles:** [Codeforces](#) | [CodeChef](#) | [LeetCode](#)

PROJECTS

- **Type-Rush** [🔗]
Tools: ReactJS, Firebase-RealtimeDB, NodeJs, ExpressJs
 - Built a real-time multiplayer typing platform with live WPM tracking, accuracy calculation, and typing performance analytics.
 - Implemented real-time multiplayer battles using Firebase Realtime Database for synchronized gameplay and live progress tracking.
 - Integrated visual performance graphs and optimized typing evaluation logic for accurate speed and accuracy measurement.
- **Enterprise B2B/B2C E-Commerce Platform (Freelance Project)** [🔗]
Tools: ReactJs, NodeJs, ExpressJs, MongoDB/MySQL, Razorpay
 - Developed a scalable B2B/B2C e-commerce platform supporting customers, vendors, and large-scale suppliers.
 - Implemented bulk ordering workflows, GST handling, vendor onboarding, and role-based access management.
 - Built secure backend APIs for authentication, product management, order processing, and payment workflows.
 - Integrated Razorpay payment gateway and designed efficient database relationships for transactional operations.
- **Vibe-Sphere** [🔗]
Tools: NodeJs, ReactJs, MongoDb, Firebase, ExpressJs, HTML, CSS
 - Built a full-stack social media platform using MERN stack with JWT authentication and real-time communication features.
 - Implemented follow/unfollow, likes/dislikes, comments, stories, and real-time chat using WebSockets.
 - Integrated Cloudinary for media storage and implemented auto-expiring stories with background lifecycle handling.
- **OneFlow – Project Management Platform** [🔗]
Role: Frontend Developer | Tools: Next.js, Tailwind CSS, ShadcnUI, TypeScript, PostgreSQL, Prisma
 - Built a multi-tenant project management platform integrating projects, tasks, timesheets, RBAC, and financial tracking workflows.

- Developed responsive frontend interfaces using Next.js, Tailwind CSS, and ShadcnUI with scalable TypeScript-based architecture.
- Implemented analytics dashboards with KPI cards, charts, PDF export, and organization-scoped project performance insights.
- Integrated PostgreSQL and Prisma-based backend workflows for timesheets, expenses, and role-based data management.

EDUCATION

- **Vishwakarma Govt. Engineering College (Gujarat Technological University)** Sept 2022 - Present
Btech in Information Technology Ahmedabad, Gujarat
 - Overall CGPA : 8.27
- **Osem Pathak School** June 2022
HSC Rajkot, India
 - Percentage : 86%

ACTIVITIES

- **Smart India Hackathon 2024 - Participant**
Role: Backend Developer
 - Developed a Platform where mentors and mentees can connect with each other,book a session with mentor.
- **Odoo Hackathon 2025-Participant**
Role: Backend Developer
 - Developed a platform named Fitpulse where user can enter their daily water intake,sleep hours,type of food consumed etc and AI based score and suggestions is given.
